## LIVE AMONG EXTRAORDINARY DESIGN

In Chicago—a city synonymous with architectural innovation and world-class design—1000M has once again raised the bar. Conceived and brought to life by Chicago legends Helmut Jahn and Kara Mann, 1000M is a true masterwork, deftly contrasting the elegance of an ultra-modern polished glass and steel exterior with the warmth of its residentially-inspired, custom-tailored interiors.

HELMUT JAHN

Envisioned by the late visionary architect Helmut Jahn, and realized by the studio carrying on his name and legacy, 1000M marks the last residential tower by Helmut before his tragic death in 2021. 1000M marks the tallest and most prominent of his numerous commissions throughout Chicago, the city which he considered his adopted home.

Born in Nuremberg, Germany in 1940, he completed his Diploma in Engineering and Architecture at the Technische Hochschule, Munich in 1965, and then came to the United States to study at Chicago's Illinois Institute of Technology.

In 1967 he joined the architecture practice C.F. Murphy Associates which was renamed JAHN in 2012. Throughout his career, Jahn has primarily worked on

large-scale residential, office/commercial, and civic buildings. Some of his more celebrated works include the United Terminal at O'Hare Airport, Sony Center on the Potsdamer Platz in Berlin, the Suvarnabhumi Airport in Bangkok, the MesseTurm in Frankfurt, One Liberty Place in Philadelphia, 500 West Madison in Chicago and 50 West in Lower Manhattan.

Mr. Jahn and his firm have earned numerous awards, including the American Institute of Architects (AIA) Fellow (1987), "Ten Most Influential Living American Architects" (1991), and 'Firm of the Year' (2005). In 2012 Mr. Jahn was awarded prestigious lifetime achievement awards from both the AIA Chicago and the Council on Tall Buildings and Urban Habitat.

KARA MANN

Kara Mann is the founder and creative director of Kara Mann Design, established in Chicago in 2005. She expanded her offices to Manhattan in 2011, where she works with an international roster of discerning clients and industry leaders on both residential and commercial projects.

Mann is known for creating environments that align her background in fashion, art, and design by re-imagining the possibilities of spatial design. Often referencing iconic fashion houses, contemporary art, and classical interiors, she conceives unexpected combinations through materiality and architecture with a focus on strong, longstanding composition. Positive tension is a focal point in her practice.

Mann further elevates spaces with her distinctive approach to interior architecture, and often transforms the physical structure of a space by creating dynamic compositions with a heightened sense of drama.

## ENJOY *UNPRECEDENTED* AMENITIES

A breathtaking silhouette, prime location and sophisticated, design-forward aesthetic demand amenities just as spectacular. All 1000M residents are invited to enjoy our more than 80,000 square feet of indoor and outdoor amenity space—more than any residential building in Chicago; a magnificent 73rd floor roof-top observation deck—the highest in the city; a winter garden, year-round swimming, and a two-story state of the art fitness and wellness facility. And that's just the beginning.
